

# Digital Communication Assignment

Nikhil Nair

## I. PROBLEM

1) Generate

$$T = U_1 + U_2$$

- 2) Find the CDF of  $T$ .
- 3) Find the PDF of  $T$ .
- 4) Find the theoretical expressions for the PDF and CDF of  $T$ .
- 5) Verify your results through a plot.

## II. SOLUTION

Let  $U_1$  and  $U_2$  are independent uniform random variable between 0 and 1.

CDF of  $T$  is given as

$$F_T(x) = \Pr(T \leq x) \quad (1)$$

$$= \Pr(U_1 + U_2 \leq x) \quad (2)$$

$$F_T(x) = \begin{cases} 0 & 0 < x \\ \frac{x^2}{2} & 0 \leq x < 1 \\ \frac{-x^2}{2} + 2x - 1 & 1 < x \leq 2 \\ 1 & x > 2 \end{cases} \quad (3)$$

The following code generates samples and plots the CDF of  $T$ .

[https://github.com/nikhilnair90/FWC/tree/main/Module-II/Digital\\_Comm/6.4/Code/6\\_4\\_cdf.py](https://github.com/nikhilnair90/FWC/tree/main/Module-II/Digital_Comm/6.4/Code/6_4_cdf.py)

PDF of  $T$  is given as

$$\Pr(T = x) = \begin{cases} 0 & 0 < x \\ x & 0 \leq x < 1 \\ 2 - x & 1 < x \leq 2 \\ 1 & x > 2 \end{cases} \quad (4)$$

The following code plots the PDF of  $T$ .

[https://github.com/nikhilnair90/FWC/tree/main/Module-II/Digital\\_Comm/6.4/Code/6\\_4\\_pdf.py](https://github.com/nikhilnair90/FWC/tree/main/Module-II/Digital_Comm/6.4/Code/6_4_pdf.py)
